

Risk Management

by Mr. Rey de Luna
22-24 August 2016 | Bali, Indonesia

Who needs to attend?

Managers, Supervisors, Team Leaders, Shift Leaders, and all support staff. No matter what your department or job function, you need to be well organized and be ready to identify risks and take corrective action to rectify the situation before it becomes a problem, an emergency, or crisis regardless of location.

Course Summary

Organizations must have solid risk management best practices in place in order to complete tasks within specified time frames, budgets, and quality requirements. Proactive risk management allows the organization to optimize all available resources by implementing proven tools to plan for both threats and opportunities.

This course offers a proven method for incorporating risk management processes as integral elements of project management. The course will present different approaches to identify various risk methods to analyze and determine their impacts, risk ranking and response techniques, and approaches to monitor, control, communicate, and eliminate risks throughout the organization.

Course Objectives

- Introduction to Risk Management Course
- What is a Risk?
- What is Risk Management?
- Types of Risks
- Difference between Hazards and Risks
- What is a Hazard
- Categories of Hazards
- Safety Precedence of Hazards
- Five Steps of Risk Assessment
- Risk Planning
